
BARE BEANS™ DARE TO BE BARE

SWAP YOUR OLD CAN OF BEANS WITH THIS BAG

ABOUT US

OUR PHILOSOPHY

We believe that you should know what is in your food and where it comes from. That is why we grow only the best beans on our farms in Idaho and we produce products with clean labels.
You should decide what is added to your food, not us.

Founder and CEO Michelle Huff created The Bare Beans Company in 2018 with a vision to bring value back to her family's farm. Michelle has been in the fresh produce industry for over 18 years, in that time she has seen an increasing demand for value-added products. Beans are a natural fit since her husband grows them. "I analyzed what I liked about beans, what I didn't like, and how I could make them better, more convenient without compromising the scratch-made quality of homecooked." From this, Bare Beans was created.

Michelle is a Minnesota native with family roots in North Dakota. She is an enrolled member of the Turtle Mountain Band of Chippewa and is proud of her indigenous ancestry. She moved to Idaho in 2003 and married her husband Robert who is a 4th generation farmer. They have two sons who are actively involved in the farm and Bare Beans.

FARMER-OWNED AND GROWN IN IDAHO

IDAHO GROWN

LOCATION/GROWERS

We take pride in our Idaho roots. On our family's farm in southern Idaho, we promise to grow and source locally (if necessary) our bean crop without pesticides. Our Bare Beans products will never be made with the use of modern biotechnology. We will never use beans or any ingredients that are genetically engineered. Currently, there are no commercially produced or imported GMO beans in the US. Dried beans have been naturally non-GMO for centuries and we plan to keep them that way.

INTRODUCING...

SCRATCH MADE QUALITY WITH MORE CONVENIENCE THAN A CAN

Available now for both retail and food service

sales@barebeans.com

FARMER-OWNED AND GROWN IN IDAHO

BARE BEANS ARE BETTER

THIS IS WHY

It's time to spill the beans. Until now, you've had two options:

1) time-consuming dried beans

2) can of mushy beans soaked in unusable liquid
and who knows what else

Bare Beans are kettle cooked with no additives or preservatives.
When you open the pouch you get **nothin' but Beans.**

Ingredients:
Pinto Beans, Water

Sodium 0 mg

Ingredients:
Prepared Pinto Beans, water, salt, calcium disodium (EDTA)

Sodium 470 mg
(20% Daily Value)

SUSTAINABILITY

CONSERVATION + STEWARDSHIP

Bare Beans growers are fourth generation family farmers cultivating crops the right way for the land, environment and tomorrow. We work to reduce our environmental footprint and to provide the healthiest product possible with best practice pesticide-free farming. We are a steward of soil health and conservation.

NON GMO Project VERIFIED
nongmoproject.org

We only grow or source (when needed) non-GMO, pesticide-free beans. We live where we grow our beans so clean air, healthy soil practices, smart farm management, clean water and conservative water management and efficient energy practices are vital as we strive to be good and sustaining neighbors in our community and beyond.

COMMUNITY HELPERS

We actively donate Bare Beans to local food banks and shelters.
We support fundraising efforts for our youth and community events.
